

07. CONTINUE IMPROVING

Your home's energy efficiency can continue to improve. At Stage 3 (Recommended Measures) you will have been provided with suggestions of potential energy-related measures that could be undertaken to improve your home, in addition to the offer for measures which can be funded via this scheme.

You can use this information on additional improvements to inform future purchases. For example, when items such as heating systems need replacing at their end of life, or to support your application for future grant schemes.

If you choose to opt-in for further correspondence at the application stage, we will contact you to provide potential further support and works that may become available on future schemes we manage.
